However, the friend system in my game is horribly broken. I connected my facebook and my friend is able to see myself well, you can see my coffee, things of order, and racing me, but I can't see them at all. If I try to open my list of friends, it is never charged and will be blocked in "load" forever. I managed to find a friend only once, but now they went and I'm able to make it work again. I tried to disconnect and reconnect my Facebook, sending them an invitation text above, and even the reinstallation of my game and nothing works. I have no problem with my wifi or data, so I can't know why it can't work. I tried to find someone with my own problem on the forums, but everything is old (with messages dating back to 2011). On a different note, my energy pets never regenerate either. I bought a dog and sent it to a raid in which he died. After a reveiver, he never went over 20 of energy. Even if it is said to rest, the energy of him has not changed in 3 days I want to love this game, really. But you feel so buggy and online support is so obsolete that I can't get any use from it. Game Screenshot Zombie Cafe (Zombie Cafe) - Surely you have enough time thought about how much you can force players to play a zombie game. After all, nothing new comes out of all of the same blood, guts, no variety. But the Zombie Cafe game is another!
